RESPONSE

MS Appeal Brief-Patents  
Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 22313

Dear Sir:

This is in response to the official letter dated April 23,  
2003 setting a one month period for response.

R E M A R K S

Attached hereto are three corrected appeal briefs  
containing a revised summary of invention with references to the  
specification.

With regard to the Examiner's comments concerning the  
appended claims, the Examiner is in error. As stated is  
M.P.E.P. 1207, the brief must be directed to the claims and to  
the record of the case at the time of appeal. The amendment

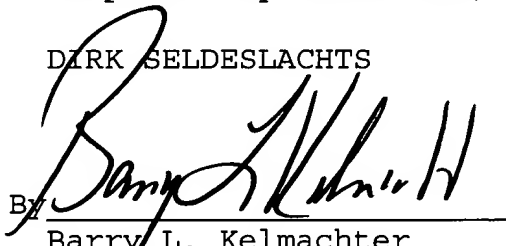

canceling claim 54 and amending claim 55 to depend from claim 28 was unentered at the time of appeal. Thus claims 54 and 55 appear in the appendix of claims. It is up to the Examiner to take action with respect to the unentered amendment and in his answer state how this affects the claims on appeal. To date, Appellant has received no Advisory Action concerning the unentered amendment.

With regard to the allowability of the claims on appeal, Appellant has presented in Sections X, subsections B and C, clear statements as to the deficiencies of the obviousness rejection made by the Examiner and presented reasons why the claims are each separately patentable. Nothing more is required. If the Examiner wishes to argue otherwise, he may do so in his Answer.

Respectfully submitted,

DIRK SELDESLACHTS
